

Terms of acceptance of ABa recycling

The goods are accepted when the following conditions are met:

1. ABa recycling only processes white and brown goods, electrical and electronic goods and metal/plastic combinations
2. ABa recycling only processes white and brown goods, electrical and electronic goods and metal/plastic combinations. All goods must be offered in full, so no pieces may be missing.
3. All products must be completely removed from their packaging, otherwise unpacking costs will be charged.
4. Brown goods, both CRT and non-CRT, small household appliances and small white goods must be supplied in box pallets in good condition, which are loaded in such a way that they are easily stackable. Brown goods, small household appliances and small white goods may be delivered mixed in the recipients,
5. Brown goods, small household appliances and small white goods, if delivered in recipients, are preferably offered in closed containers.
6. All incoming and outgoing materials are weighed on our calibrated weighbridges. Only ABa recycling weighing slips are valid. Weighing slips from other weighbridges are therefore not accepted.
7. A delivered batch of goods is considered to be a mixed delivery of CRT and non-CRT containing brown goods and will be sorted/processed via a detailed order processing.
8. CRT material must be presented with intact CRT.
9. When dismantling the equipment, no dangerous situations must arise for employees and/or the environment, therefore goods must be delivered in pure condition.
10. There must be no hazardous waste in the box pallets or goods (medicines, syringes, radioactive elements, loose mercury switches, loose capacitors, explosives, gas cylinders,...). All goods must also be cleaned of oils, fats and/or chemical waste, water, foodstuffs,... . They must also not contain asbestos.
11. Material that is not supplied in accordance with the aforementioned acceptance conditions may be refused, in whole or in part. ABa recycling undertakes, in the event of a non-compliant delivery, to inform the provider by email within a period of 1 working day after the identification of the anomaly, and this until the day of processing. The provider has 48 hours from this notification to remove the non-compliant waste (or have it removed). If the provider wishes, ABa recycling can

take care of the disposal of these wastes. The costs for removal and treatment are then entirely borne by the provider.

After the expiry of the period of 48 hours after notification, ABa recycling itself will be responsible for the disposal of these wastes. All costs for the disposal and treatment of these wastes are borne entirely by the provider.

12. Any transport of goods must be registered with ABa recycling before delivery. In the case of deliveries that require immediate loading, such as the immediate emptying of a container, this must be clearly stated at the time of notification.
13. Deliveries must take place between 8.00 am and 4.20 pm or by appointment.
14. Payment terms: 8 days after the invoice date (unless otherwise stated on the invoice)
15. In the event of late payment of our invoices, the resulting costs will be charged:
2° payment reminder: 20€ supplement, 3° payment reminder: 50€ supplement, lawyer: 500€ supplement plus court costs.
16. In case of loss of double wooden pallet boxes, metal roll containers or plastic battery boxes, a cost of 198€ excl VAT will be charged per lost container.
17. Return of empty boxes/containers will be invoiced at the piece transport price per box/container.
18. The requested number of pallet places to be picked up will always be charged, unless there are more.
19. A deposit of 50€/piece will be charged per box/container.
20. In the context of circular thinking and general acceptance in order to optimally increase the recycling/reuse rate, all goods offered are sorted and processed to see if they can still be applied for reuse. This is standard procedure. This can only be deviated from if the customer explicitly requests a 'destruction certificate' in writing by e-mail before delivery and this again and again with each new delivery.
21. The materials must be in a cardboard box, on a pallet or in a container, well filmed with plastic film so that they do not come loose during transport.
22. The name sheet that is sent after the request with each order must be affixed to each pallet/cardboard/container.
23. The delivery of goods for processing, this explicitly implies agreement with these acceptance conditions and with our "General terms and conditions for the sale of goods and provision of services".
